Why Us

About Us

Prashanth N, the Principal Founder of Studio Equilibrium, is a Registered Architect under the Council of Architecture, India, and holds a Bachelor of Architecture from BMS College of Engineering. He embarked on his professional journey in 2012, amassing over a decade of experience and fostering a deep commitment to his craft.

Having garnered extensive experience working alongside prominent architects in Bangalore, Prashanth has had the privilege of contributing his expertise to a diverse array of projects. These include the design and realization of residential, institutional, industrial, healthcare, and commercial spaces, with his influence stretching across the landscape of India.

In his projects, he prioritizes contextual design, challenging perceptions and offering fresh perspectives. Meticulous attention to detail defines his approach, resulting in holistic designs that seamlessly blend aesthetics with clients' personalities.

Throughout the project, he displays willingness and adaptability, driven by a strong sense of learnability, curiosity, and innovative ideas.

Prashanth's commitment to architectural excellence is underpinned by his belief that each project should enhance the human experience. Through Studio Equilibrium, he continues to shape the architectural landscape with innovative and harmonious designs.

Integrated Solutions

Studio Equilibrium provides a wide array of services, covering architectural design, master planning, and interior design.

Architecture

Architects offer services such as concept development, construction document preparation, and construction administration. They also conduct feasibility studies, define project requirements through architectural programming, and provide project co-ordination.

Master Planning

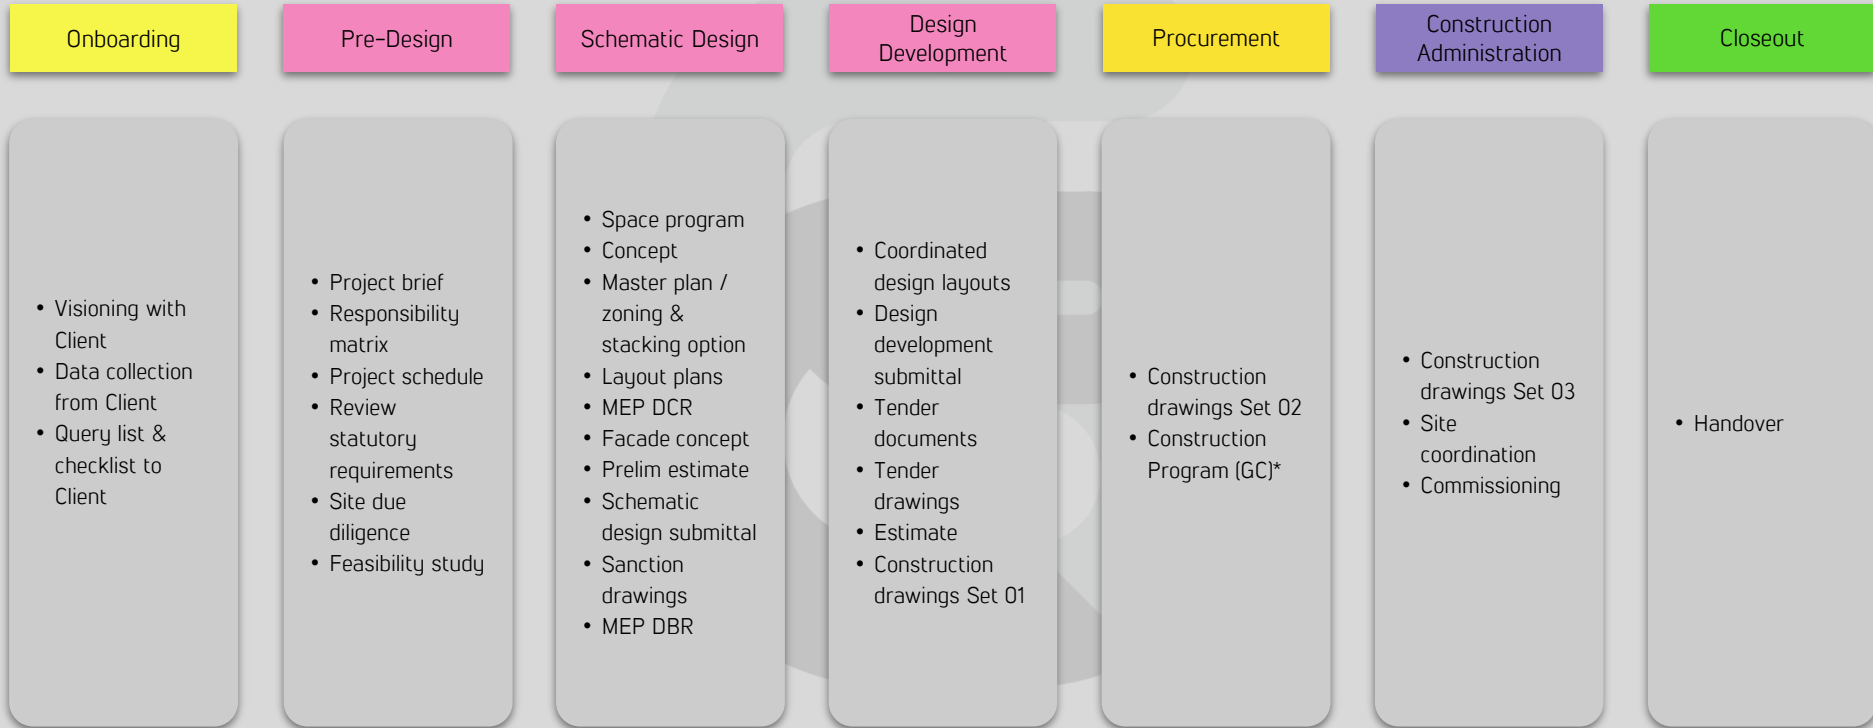

The firm specializes in master planning for various projects, whether it's designing vibrant mixed-use communities or optimizing institutional campus layouts. Architects carefully analyze site conditions and consider terrain to strategically position buildings.

Interiors

The firm offers complete interior design solutions for residential and small-scale commercial ventures. Interior designers collaborate with clients to create functional, aesthetically pleasing spaces by selecting furnishings, finishes, lighting, and décor elements.

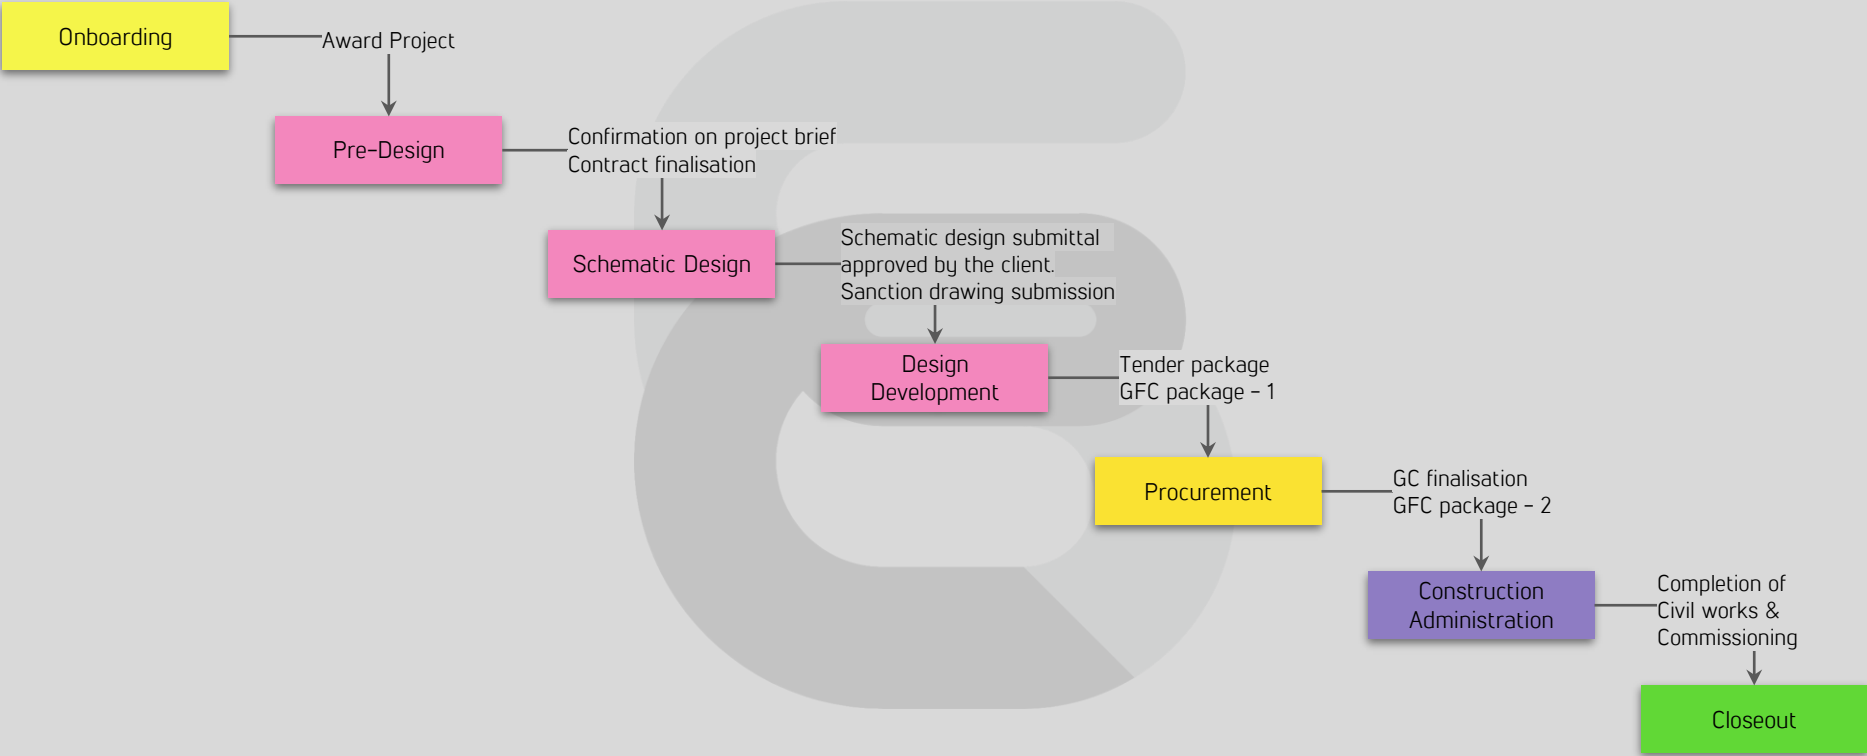

*Structural design, MEP (Mechanical, Electrical, and Plumbing), IOT integration, Fire suppression system, landscaping design etc are outsourced to external consultants to ensure comprehensive project expertise.

Our Process – Architecture

* The aforementioned phases align with the architectural standards established by RIBA, which are internationally recognized and adhered to by architects worldwide

Stage Transition - Architecture

Our Process – Interiors

Onboarding

Multipurpose Block, SNIST

Built-up area : 5,00,000 sq ft | Site area : 2,70,000 sq ft | Status : Upcoming
Location : Hyderabad, India

The design of this Academic building of around 5,00,000 square feet spread across 8 floors attempts to break out of the inevitable repetitiveness of typical classrooms by creating spaces of various volumes at various levels, streamlining connectivity between departments, and a mixture of closed and open gathering and spillover spaces at the ground level.

The following facilities were included in the proposed building:

Classrooms - 100 units | Gallery classrooms - 4 units | Labs - 32 units | Staff rooms - 10 units | Student change rooms - 4 units | Washrooms - 32 units | Auditorium - 1 unit | Canteen - 1 unit | Parking space

Classroom Block, SNU

Built-up area : 1,50,000 sq ft | Site area : 1,30,000 sq ft | Status : Under construction

Location : Hyderabad, India

Phase 1 of Classroom building was started as an extension of SNIST's campus with G+1 structure, later the requirements were upgraded as per the vision of the Chairman, Dr. K.T.Mahhe, to start Sreenidhi University. The design of the Classroom block was revamped to cater to the facilities and needs of the new university building spread across 6 floors.

The entrance to the building welcomes with the dynamic entry courtyard like space. This space becomes the meeting / gathering space for students as they enter the building. The built form reacts to the need to provide the University building with a distinct contemporary identity.

The following facilities were included in the proposed building:

Classrooms - 57 units | Labs - 10 units (Computer / Physics / Chemistry / Communication skills) | Library - 1 unit | Admin office - 1 unit (Chairman / Principal / Examination board) | Seminar hall - 1 unit | Staff rooms - 3 units | Washrooms - 22 units

School At Kochi

Built-up area : 3,00,000 sq ft | Status : Upcoming

Location : Kochi, India

A 7.5 acre integrated campus in the outskirts of Kochi, the school comprises of academic blocks for classes from Kindergarten to Class 12, accommodation facilities for the students and the staff, a state of the art sports complex, an open air theatre and a performing arts center containing two theatres. The design attempts to annihilate the intimidating look of tall structures by maintaining a lower height for all the blocks, keeping the campus kid-centric.

The challenge was to infuse all these low-rise blocks into the site, retaining its natural slope. Multiple courtyards and plazas link these blocks and these transitional spaces form the crux of the campus. Laterite stone, an indigenous material has been substantially used throughout the campus.

The projects shown and above are the works undertaken by Prashanth during his tenure with his previous employers.

Boys Campus, GSIS

Built-up area : 3,00,000 sq ft | Site area : 6,00,000 sq ft | Status : Completed

Location : Ooty, India

Good Shepherd International School – A residential school campus located in Ooty, with the total campus area spanning over 90 acres. As a part of campus expansion, phase-2 development started in the year 2015. The master planning for the boys campus was carefully handled to make it a part of the existing campus. The challenges included placing the building block on the steep contours on site while making the movement smoother.

The following facilities were included in the proposed building:

Dormitories | Dining hall | Auditorium | Gymnasium | Indoor sports complex | Staff residences

Tata Cancer Center, Mangalore

Area : 3,20,000 sq ft | Location : Mangalore, India | Status : Completed

Tata Trusts Cancer Care program proposes a network of distributed cancer care to create a chain of over 100 patient-centric cancer hospitals all across India, to deliver standardized and affordable care closer to patient's homes. This 170 bed facility, located in Yenepoya University, has advanced diagnostic and treatment functions including state of the art medical, surgical and radiation oncology care.

RBMC Saar, Bahrain

Area : 10,000 sq ft | Location : Bahrain | Status : Completed

Intended as a boutique clinic catering to the wealthy expatriate demographic residing nearby, this 10,000 sq ft facility is housed within an upcoming mall in Bahrain.

The facility comprises primarily of consultation rooms, selected diagnostic facilities and a physiotherapy wing. The consultation houses practitioners of General Medicine, Internal Medicine, Pediatrics, Dental and Dermatology. Three Laser Procedure rooms for dermatology are also accommodated within the clinic.

The design seeks to redefine the aesthetics of the boutique health clinic and emphasizes a minimalist approach laying prominence to evocative textures and subtle tones. The muted palette is brought to life through the temporal variation of light and the integration of natural elements like wood, stone and water. The careful articulation of spaces clubbed with the rustic materiality creates an intimate and homely setting for the clinic.

KIMS UMM AL HASSAM, Bahrain

Area : 80,000 sq ft | Location : Bahrain | Status : Completed

This large multi speciality hospital is situated at the heart of Bahrain, and is intended to cater to a wide spectrum of people. The facility comprises a total built up area of 80,000 sq.ft housing a wide array of departments.

The design focused on creating invigorating public areas within the hospital through the use of a vibrant material palette. Wayfinding was also a critical aspect driving the design, and the various zones of the hospital was designed to aid the visitor in orientating themselves within the facility. A warm material palette was preferred in the patient rooms to create a serene and calm ambience to aid in recovery.

The comfort of the visitor and the operational needs of the staff drove all aspects of the design thus ensuring an efficient facility.

Nandeesh Residence

Built-up area : 7,000 sq ft | Site area : 3,200 sq ft | Status : Ongoing
Location : Bangalore, India

Step into this inviting home, where a charming verandah beckons you into the airy foyer. This spacious residence boasts five bedrooms, a formal living area, a dining room, a puja room, a modern kitchen, and a cozy family living space, all thoughtfully designed in the Scandinavian minimalistic style.

Simplicity takes center stage in this design, featuring clean lines, abundant natural light, and open layouts that promote easy movement. The minimalist approach values functionality, tranquility, and a sense of well-being. The decor exudes comfort, warmth, and coziness, embracing a serene ambiance. Expect single-tone, neutral walls that serve as a canvas for subtle, accent colors found in the carefully chosen furniture and textiles. This home harmoniously blends aesthetics and practicality, making it a haven for both relaxation and everyday living.

Home On The Hill

Built-up area : 10000 sq ft | Site area : 3,000 sq ft | Status : Completed
Location : Wayanad, India

Nestled among the picturesque hills of Wayanad, this contemporary four-bedroom retreat crowns a hill, granting breathtaking views of the verdant landscape. Crafted with the client's quest for modern seclusion in mind, the design seamlessly merges indoor and outdoor spaces by incorporating nature within the dwelling.

Extensive wooden overhangs, reminiscent of the locale, shield the house from monsoons and heat. The warm wooden-toned roof gracefully extends indoors, blending with the site's natural contours. Subdued hues adorn the interior, allowing the earthy surroundings to permeate the dwelling, enhancing the tranquil harmony with the robust yet serene nature that envelops it.

Estuate Software

Built-up area : 1,30,000 sq ft | Site area : 43,560 sq ft | Status : Completed
Location : Bangalore, India

Located in KIADB – SEZ, Bangalore, our commercial software building design embraced a two-phase approach. Phase 1 featured two basements for parking and utilities, along with a ground floor housing the software corporate office. Phase 2 introduced an innovative twist, incorporating prefabricated construction for the upper floors up to the fifth level.

A unique challenge presented itself due to the site's corner location, with the facade exposed to the scorching western sun. Tackling this challenge head-on, our design prioritized energy efficiency. Through meticulous planning and strategic placement of shading elements, we successfully mitigated solar heat gain, ensuring a comfortable and sustainable environment for the occupants. This project exemplifies our commitment to innovative design solutions that harmonize function and sustainability in the commercial sector.

The projects showcased above are the works undertaken by Prashanth during his tenure with his previous employers.
